Introduction

This Work Report & Plan provides time estimates and descriptions of services that will be provided in the following fiscal year. Costs associated with these services are supplied in the budget index found in section 3. In addition, three-year labor/service and fiscal projections are provided for reference.

Section 1. CCGISC Tasks

The Champaign County GIS Consortium (CCGISC) tasks are categorized into three groups: 1) core services and support functions, 2) work tasks and 3) technical service contracts. Core service and support function tasks are fundamental to the operation of the CCGISC. Work tasks are new initiatives identified by the CCGISC members that will continue to improve efficiency, decision-making, communication, education, and recordkeeping within their member organizations. Technical service contracts provide GIS related support to agencies on a contractual basis. Together, these tasks assist in accomplishing the goals set forth in the Intergovernmental Agreement.

Section 1A. Core Services and Support Functions

Core services and support functions are grouped into five general categories - GIS Data Layers, Consortium Support, Data Distribution, Management, and Education and Training. Anticipated time allocation for each of these categories is found below. Time allocation estimates are based on current and historic allocation data as well as staff input. In addition, narratives are provided for each of the five categories.

Section 1A-1. GIS Data Layers

One of the missions of CCGISC is to provide Consortium members with up-to-date, high quality regional GIS data. To provide this service, it is necessary to **maintain** and **improve** the existing, or “core” GIS data layers.

ANNUAL MAINTENANCE AND QUALITY CONTROL

The performance of maintenance and quality control procedures are methods utilized by CCGISC staff to provide high quality GIS data. Most of the data layers are in constant transition to reflect the changes of the features the layers represent. When changes are reported to CCGISC staff, the layers are updated in a timely manner. In addition, quality control procedures are executed to maximize data accuracy.

IMPROVEMENT TASKS

The top priority of the CCGISC staff is to maintain and refine the core GIS layers, services, and support functions. Improvement tasks are divided into two categories 1) short-term tasks that are finite and will be completed within the next 3-years and 2) on-going tasks that require periodic review or refinement.

In fiscal year 2020 thirty-one (31) weeks of staff time has been reserved for improvement tasks. The table below contains a brief description of the identified improvement tasks, an estimate of the total time needed to complete the task, and the anticipated completion year.

Identified Improvement Tasks	Description	Time Estimate (weeks)	Anticipated Completion Year

Section 1A-2. Consortium Support

A basic function of CCGISC is to assist member agencies through the promotion and use of GIS technology and data. To accomplish this function, CCGISC staff assists members with technical support issues and small projects. In addition, staff provides member data updates, viewing applications, and fills data release requests.

Section 1A-3. Data Distribution

CCGIS is charged with the responsibility of distributing and promoting the use of the GIS. To meet this goal, CCGISC utilizes a variety of distribution methods and platforms including, but not limited to, the following:

- ♦ *Tax Map Atlas website*
- ♦ *CCGIS web site*
- ♦ *Document distribution through a web enabled document file server*
- ♦ *Data sales*
- ♦ *ArcGIS Online applications*
- ♦ *Published Services*
- ♦ *Database Views*
- ♦ *Web mapping applications (Address, Public, Genealogy)*
- ♦ *Enterprise geodatabase connections and published services*

Section 1A-4. Management

Management includes program and project management as well as database management and server administration. Program management is carried out by the GIS Director. Program management tasks include the preparation of committee meeting documents and responding to committee meeting requests, budgetary and fiscal tasks, and technology improvement plans. In addition to the Policy Committee there are a number of working groups including Technical Representatives, Sanitary, Addressing, and Technology Improvement that require coordination efforts and documentation development.

Section 1A-5. Education and Training

GIS software and applications continually evolve. Education and training is necessary to maintain and improve CCGISC staff skills. The CCGISC staff typically attends at least one local conference a year and is encouraged to experiment and research tools that may improve efficiency levels. In addition, webinars, workshops, and other training and education outlets are utilized.

Section 1B. Work Tasks

A GIS continuously evolves and grows because it provides a wide variety of benefits. CCGISC work tasks are projects identified by the CCGISC members that increase efficiency and improve decision making within their member organizations. As work tasks are completed, the resulting products are added to core services.

Work tasks are determined by the CCGISC Technical Representatives and ultimately accepted by the member organizations with approval of this document by the CCGISC Policy Committee. The work tasks are listed in prioritized order in the table below.

Work Tasks	Description	Time Estimate (weeks)	Completion Date (fiscal year)
1. US Census New Construction	Provide Census Bureau new residential addresses between LUCA submission and Census Day	3.0	2020
2. NG-911 Required Data	Update Street centerlines, address points, and alias table	19.0	2020
3. Map Drainage Districts and Subdistricts	Utilize Circuit Clerk documents to map drainage districts and sub-districts	24.0	2021
4. Map Drainage District Tiles	Utilize Circuit Clerk documents to map drainage tiles	16.0	2022

6. Gather and Store Street Network Impedance Data for Computer Aided Dispatch	For example speed limits, stop signs, stop lights, one way streets, etc. for Computer Aided Dispatch Systems	10.0	2022

In fiscal year 2020, it is estimated that 15 weeks of staff-time are available for work tasks. The table above includes time estimates and the anticipated completion year for each task.

Section 1C. Technical Service Contracts

Technical service contracts provide GIS related support to agencies on a contractual basis. In fiscal year 2020, it is anticipated service contracts will account for approximately 9% (\$54,000) of the total revenue. It is anticipated that contractual agreements with the following agencies will be in place in FY2020.
