Introduction

This Work Plan and Report provides time estimates and descriptions of services that will be provided in the following fiscal year. Costs associated with these services are supplied in the budget index found in section 3. In addition, two-year labor/service and three-year fiscal projections are provided for reference.

Section 1. CCGISC Tasks

The Champaign County GIS Consortium (CCGISC) tasks are categorized into three groups: 1) core services and support functions, 2) initiatives and 3) technical service contracts. Core service and support functions are fundamental to the operation of the CCGISC. Initiatives are tasks identified by the CCGISC staff and member agencies that improve efficiency, decision-making, communication, and education as well as support on-going operations. Technical service contracts provide GIS related support to agencies on a contractual basis. Together, these tasks assist in accomplishing the goals set forth in the Intergovernmental Agreement.

Section 1A. Core Services and Support Functions

Core services and support functions are grouped into five general categories - GIS Data Layers, Consortium Support, Data Distribution, Management, and Education and Training. Anticipated time allocation for each of these categories is found below. Time allocation estimates are based on current and historic allocation data as well as staff input. In addition, narratives are provided for each of the five categories.

CCGISC Core Services & Support Functions Total:	193.00	205.00	

Section 1A-1. GIS Data Layers

One of the missions of CCGISC is to provide Consortium members with up-to-date, high quality regional GIS data. To provide this service, it is necessary to **maintain** and **improve** the existing, or “core” GIS data layers.

ANNUAL MAINTENANCE AND QUALITY CONTROL

The performance of maintenance and quality control procedures are methods utilized by CCGISC staff to provide high quality GIS data. Most of the data layers are in constant transition to reflect the changes of the features the layers represent. When changes are reported to CCGISC staff, the layers are updated in a timely manner. In addition, quality control procedures are executed to maximize data accuracy.

DATA REVIEW

The top priority of the CCGISC staff is to maintain and refine the core GIS layers, services, and support functions. Data Review includes on-going tasks that require periodic review or refinement including, but not limited to, the items listed below:

- ♦ *Review and Update SDE layers, Tables and Feature Datasets*
- ♦ *Develop/Maintain/Update Workflow and Quality Control Procedures*
- ♦ *Develop and Maintain Web Apps*

Section 1A-2. Consortium Support

A basic function of CCGISC is to assist member agencies through the promotion and use of GIS technology and data. To accomplish this function, CCGISC staff assists members with technical support issues and small projects. In addition, members receive data updates and mapping applications. CCGISC staff also handle data release requests for the member agencies.

Section 1A-3. Data Distribution

CCGIS is charged with the responsibility of distributing and promoting the use of the GIS. To meet this goal, CCGISC utilizes a variety of distribution methods and platforms including, but not limited to, the following:

- ♦ *Tax Map Atlas website*
- ♦ *CCGIS web site*
- ♦ *Document distribution through a web enabled document file server*
- ♦ *Data sales*
- ♦ *ArcGIS Online/Portal applications*
- ♦ *Published Services*
- ♦ *Database Views*
- ♦ *Web mapping applications (Address, Public, Genealogy)*
- ♦ *Enterprise geodatabase connections*
- ♦ *Portal/ArcGIS Online Collaborations*

Section 1A-4. Management

Management includes program and project management as well as database management and server administration carried out by the GIS Director. Program management tasks include the preparation of committee meeting documents and responding to committee meeting requests, budgetary and fiscal tasks, and technology improvement plans. Projects and initiatives are coordinated with the Technical Representative working group. When required, additional working groups are established. Past groups include Sanitary, Addressing, and Technology Improvement.

Section 1A-5. Education and Training

GIS software and applications continually evolve. Education and training are necessary to maintain and improve CCGISC staff skills. The CCGISC staff typically attends at least one local conference a year and is encouraged to experiment and research tools that may improve efficiency levels. In addition, webinars, workshops, and other training and education outlets are utilized.

Section 1B. Initiatives

A GIS continuously evolves and grows because it provides a wide variety of benefits. Initiatives are tasks identified by the CCGISC staff and member agencies that improve efficiency, decision-making, communication, and education as well as support on-going operations. As initiatives are completed, resulting products are added to the core services.

Initiatives are reviewed by the CCGISC Technical Representatives and ultimately accepted by the member organizations with approval of this document by the CCGISC Policy Committee. The FY2023 initiatives are listed in the table below.

2023 Initiatives	Comments
Metadata Creation**	- Automate creation of metadata for all tables, views and layers
Website**	- Overhaul CCGISC Website; New logo, etc.
Address Website	- Correct issues with identify tool - Cosmetic updates; currently does not render correctly in all browsers
Address Schema Changes	- Remove Address Number Suffix from Main Address Table i.e. 102A Main Street. Main Address to be 102 Main Street
Devnet QC Script	- Write a Script that checks for data entry inconsistencies; this impacts the Consortium as entry errors may create problems for views. It is also to limit the distribution of bad data. Examples: Document numbers, dates, etc.
CCGIS Data Policy Review	- Internal review of CCGISC Data Policy and recommend any necessary updates/changes to Policy Committee (<i>last reviewed in 2017</i>)
Genealogy**	- Complete Genealogy review/corrections
Geolocator Upgrade ArcGIS Pro	- Upgrade Geolocators to ArcGIS Pro

It is estimated that 19 weeks of staff-time are available to complete initiatives in FY2023 and FY2024 – see the Work Task Section in Table 2A for additional details.

Section 1C. Technical Service Contracts

Technical service contracts provide GIS related support to agencies on a contractual basis. In fiscal year 2023, it is anticipated service contracts will account for approximately 10% (\$60,500) of the total Operating Budget revenue. Contractual agreements in FY2023 include the following:

- ♦ *Piatt County*
- ♦ *Douglas County*
- ♦ *City of Champaign*
- ♦ *Urbana-Champaign Sanitary District*
- ♦ *Village of Mahomet*
- ♦ *METCAD*
